CONTENTS

Introduction: Perspectives in Radioprotection 1
J. F. WEISS and M. G. SIMIC

SESSION I: IS A RADIOPROTECTOR FEASIBLE?

Clinical Trials of WR-2721 Prior to Alkylating Agent Chemotherapy and Radiotherapy 3
D. GLOVER, K. R. FOX, C. WEILER, M. M. KLIGERMAN, A. TURRISI and J. H. GLICK

Acute Radiation Injuries 9
R. I. WALKER

Requirements of Radioprotectors for Military and Emergency Needs 13
R. I. WALKER

Radioprotectors in Treatment Therapy to Reduce Risk in Secondary Tumor Induction 21
D. J. GRDINA, B. NAGY and C. P. SIGDESTAD

Cherbonyl in Retrospect 27
R. W. YOUNG

SESSION II: RADIOPROTECTORS FOR CELLULAR AND TISSUE INJURY: WHAT IS NEEDED?

Specific Protection of Different Normal Tissues 33
J. S. RASEY, A. M. SPENCE, C. C. BADGER, K. A. KROHN, D. M. VERA and J. C. LIVESEY

Protection Against the Physiological Derangements Associated with Acute Intestinal Radiation Injury 45
J. P. GERACI, K. L. JACKSON and M. S. MARIANO

Redox Competition and Radiosensitivity: Implications for Testing Radioprotective Compounds 59
J. DENEKAMP, A. ROJAS and G. STEVENS

Aspects of Radiation-Induced Gastrointestinal Injury and Radioprotection 67
A. DUBOIS

Behavioral Radioprotection 73
V. BOGO

Measurement of the Radiosensitivity of Rat Marrow by Flow Cytometry 79
K. F. McCARTHY and M. L. HALE

Brief Communication: Functional and Morphological Alterations Following Irradiation of Isolated Rat Stomach. A Model for Estimation of Radiation Injury 85
Z. WESHLER, M. LIGUMSKI, Z. TOCHNER, J. KOPOLOVIC, F. CARMELI and D. RACHMILEWITZ

Brief Communication: WR-2721, WR-77913 and WR-3689 Radioprotection in the Rat Spinal Cord 89
A. M. SPENCE, K. A. KROHN, J. E. STEELE, S. E. EDMONDSON and J. S. RASEY

Brief Communication: Effects of Ethiofos (WR-2721) and Radiation on Monkey Visual Discrimination Performance 93
V. BOGO, C. G. FRANZ, A. J. JACOBS, J. F. WEISS and R. W. YOUNG

Brief Communication: Comparative Behavioral Toxicity of Four Sulfhydryl Radioprotective Compounds in Mice: WR-2721, Cysteamine, Diethyldithiocarbamate, and *N*-acetylcysteine 97
M. R. LANDAUER, H. D. DAVIS, J. A. DOMINITZ and J. F. WEISS

SESSION III: WHAT PROTECTION IS NEEDED AT THE MOLECULAR LEVEL: DNA VS MEMBRANE?

Protection of DNA by Thiols 101
R. C. FAHEY

Radioprotection of Membranes 109
J. A. RALEIGH

Relationship between Intracellular GSH Levels and Hypoxic Cell Radiosensitivity 115
M. B. ASTOR, M. E. ANDERSON and A. MEISTER

Models for Thiol Protection of DNA in Cells 123
K. D. HELD

Effects of Radioprotectors on DNA Damage and Repair, Proteins, and Cell-Cycle Progression 133
D. J. GRDINA, W. H. GUILFORD, C. P. SIGDESTAD and C. S. GIOMETTI

Radiation Chemical Considerations for the Radioprotection of Cellular Targets 139
C. L. GREENSTOCK

Brief Communication: Sensitive Detection of Single-Strand Breaks in DNA after *In Vivo* Exposure to Ionizing Radiation to Evaluate the Effects of Protecting Agents 147
G. P. VAN DER SCHANS, R. H. GROENENDIJK and P. H. M. LOHMAN

Brief Communication: Radioprotection of Irradiated DNA and Its Model Compounds 149
C. R. PAUL, A. V. ARAKALI and H. C. BOX

Brief Communication: Radioprotective Action of Aminothiols *In Vitro* and *In Vivo*: Comparison Between Effects on DNA Damage and Cell Survival 151
D. MURRAY, S. C. VANANKEREN, L. MILAS and R. E. MEYN

Brief Communication: Model Experiments to Evaluate the Protective Role of Thiols and Other Reductants Against Oxidative Damage 155
M. TAMBA, G. SIMONE, M. QUINTILIANI and P. DEL SOLDATO

SESSION IV: PROTECTION BY SULFHYDRYL COMPOUNDS—THE FUTURE AFTER WR-2721

Can WR-2721 Be Improved Upon? 157
D. Q. BROWN, W. J. GRAHAM III, L. J. MACKENZIE, J. W. PITTOCK III and L. M. SHAW

Endogenous Versus Exogenous Thiols in Radioprotection 169
O. VOS and W. S. D. ROOS-VERHEY

Radioprotectors in Tumor Radiotherapy: Factors and Settings Determining Therapeutic Ratio 179
L. MILAS, D. MURRAY, W. A. BROCK and R. E. MEYN

Protection Against Ionizing Radiation by Combinations of Radioprotectors 189
J. R. MAISIN

Pharmacokinetics of WR-2721 195
L. M. SHAW, D. GLOVER, A. TURRISI, D. Q. BROWN, H. S. BONNER, A. L. NORFLEET, C. WEILER, J. H. GLICK and M. M. KLIGERMAN

Bioavailability and Newer Methods of Delivery of Phosphorothioate Radioprotectors 203
L. FLECKENSTEIN, N. F. SWYNNERTON, T. M. LUDDEN and D. J. MANGOLD

Brief Communication: Bone Marrow Cell Protection and Modification of Drug Toxicity by Combination of Protectors 213
P. UMA DEVI and B. THOMAS

Brief Communication: *In Vitro* Metabolism of the Phosphorothioate Radioprotectors WR-2721 and WR-3689 215
J. C. LIVESEY, J. S. RASEY, S. VERTREES, L. M. FREEMAN, S. MAGEE, N. J. NELSON, L. CHIN, Z. GRUNBAUM and K. A. KROHN

Brief Communication: Thermospray Liquid Chromatography Mass Spectrometry of Thiol Radioprotective Agents: Characteristic Spectra 219
T. L. WALDEN Jr, J. BUCHNER, V. PIZZITOLA and W. F. BLAKELY

SESSION V: IMMUNOTHERAPEUTIC AGENTS AS RADIOPROTECTORS

From Endotoxins to Newer Immunomodulators: Survival-Promoting Effects of Microbial Polysaccharide Complexes in Irradiated Animals 223
E. J. AINSWORTH

Survey of Newer Biological Response Modifiers for Possible Use in Radioprotection 243
M. A. CHIRIGOS and M. L. PATCHEN

Radioprotection by Biological Response Modifiers Alone and in Combination with WR-2721 247
M. L. PATCHEN, M. M. D'ALESANDRO, M. A. CHIRIGOS and J. F. WEISS

Radioprotection by Polysaccharides 255
J. R. MAISIN, S. TOPALOVA, A. KONDI-TAMBA and G. MATTELIN

Role of Cytokines in Radioprotection 261
R. NETA

Brief Communication: Inhibition of Human T Cell Responses by Hydrogen Peroxide 267
B. M. FREED, D. A. PATTERSON, R. RAPOPORT, D. A. LAWRENCE and N. LEMPERT

SESSION VI: CAN ENDOGENOUS PROTECTION BE ENHANCED?

Role of Glutathione and Other Endogenous Thiols in Radiation Protection 269
J. B. MITCHELL, J. E. BIAGLOW and A. RUSSO

Antioxidant and Redox Enzymes in Radioprotection 275
J. E. BIAGLOW, M. E. VARNES, E. R. EPP and E. P. CLARK

Increased Radioprotection by Enhancement of Enzymatic Mechanisms 287
R. B. PAINTER

Elevation of Intracellular Glutathione Levels Following Depletion and Its Relationship to Protection Against Radiation and Alkylating Agents 293
Y. C. TAYLOR and J. M. BROWN

Radioprotection by Antioxidant Enzymes and Enzyme Mimetics 301
K. S. KUMAR, Y. N. VAISHNAV and J. F. WEISS

Increased Radioprotection Attained by DNA Repair Enhancement 311
E. RIKLIS, R. KOL, M. GREEN, A. PRAGER, R. MARKO and M. MINTSBERG

Brief Communication: Effect of Superoxide Dismutase on X-Ray Induced Chromosome Abberrations and Cell Cycle Delay in Muntjac Lymphocytes 323
A. CHATTERJEE and M. JACOB-RAMAN

Brief Communication: The Effect of Superoxide Dismutase on the Pathogenesis of Radiation-Induced Pulmonary Damage in the Rat 327
K. MALAKAR and R. M. DAS

Brief Communication: A New Perspective of Radiation Protection by Metallothionein Induction 331
J. MATSUBARA, Y. TAJIMA, A. IKEDA, T. KINOSHITA and T. SHIMOYAMA

SESSION VII: WHAT CAN NON-SULFUR COMPOUNDS CONTRIBUTE TO RADIOPROTECTION?

Prodromal Effects of Radiation: Pathways, Models and Protection by Antiemetics 335
R. K. HARDING

Radiation Protection *In Vivo* by Prostaglandins and Related Compounds of the Arachidonic Acid Cascade 347
W. R. HANSON, K. A. HOUSEMAN and P. W. COLLINS

Role of Vitamin A and β Carotene in Radiation Protection: Relation to Antioxidant Properties 357
E. SEIFTER, J. MENDECKI, S. HOLTZMAN, J. D. KANOFSKY, E. FRIEDENTHAL, L. DAVIS and J. WEINZWEIG

Mechanisms of Radiation-Induced Emesis in the Dog 367
D. O. CARPENTER, D. B. BRIGGS and N. L. STROMINGER

Role of Mast Cell Mediators in Radiation Injury and Protection 373
M. A. DONLON

Radioprotection by Leukotrienes: Is There a Receptor Mechanism? 379
T. L. WALDEN Jr. and J. F. KALINICH

Calcium Antagonists in Tissue Protection 385
F. BATTAINI, S. GOVONI, M. TRABUCCHI and R. PAOLETTI

Brief Communication: Studies on the Role of Antioxidants in Radioprotection 389
M. R. L. STRATFORD, R. J. HODGKISS and R. R. WATFA

Brief Communication: Effects of Administering Tocopherol after Irradiation on Survival and Proliferation of Murine Lymphocytes 393
R. M. ROY, M. PETRELLA and H. SHATERI

Brief Communication: Circadian Susceptibility-Resistance Cycles to Radiation and Their Manipulability by Methylene Blue 397
L. E. SCHEVING, T. H. TSAI, R. B. SOTHERN and W. J. M. HRUSHESKY

SESSION VIII: CONCLUDING SESSION

Overview of Symposium: Physiologic Mechanisms in Radioprotection 403
T. L. PHILLIPS

Overview of Symposium: Chemical Mechanisms in Radioprotection 405
G. E. ADAMS
